Foedust Workings

- Stubborn stains can lead to corrosion, reduced efficiency, and costly replacements if left untreated. At Foedust, we offer specialized stain cleaning services using innovative technologies designed to restore surfaces and extend their lifespan.
- Our process combines high-pressure steam, mechanical scrubbing brushes, eco-friendly biodegradable chemicals, and blasting techniques—tailored to the surface and severity of the stain. This service is suitable for metal sheet buildings, industrial floors, machinery, and more.
- By eliminating stains early, we help prevent corrosion, avoid unnecessary painting or material replacement, and ultimately prolong the life of your assets.

Customer Scope of Work / Responsibilities

- High access equipment (scaffolding / boom lift / ladder) must be provided by the customer.
- A designated and safe work area must be allocated prior to commencement of work.
- Continuous and adequate power supply must be provided at the work location.
- Necessary work permits and site approvals must be arranged by the customer.
- Clear access to the work area must be ensured before starting the job.
